Complying with the NIH Public Access Policy

http://www.library.ucla.edu/libraries/11891.cfm

As of April 7, 2008, compliance with the National Institutes of Health (NIH) public access policy is mandatory. The policy requires that researchers receiving NIH grant money submit copies of their resulting research papers to PubMed Central (PMC) when those papers are accepted for publication in a journal. PMC, the NIH's free digital archive of biomedical and life sciences journal literature, will then make the papers freely available to the public no later than twelve months after publication.

Making research results publicly accessible is important not only to the NIH. It is also an essential element of UCLA's commitment to academic freedom and its mission as a public research university to create and disseminate knowledge for the betterment of society.

This program for UCLA faculty, researchers, and administrators is co-sponsored by the UCLA Library, Academic Senate, Academic Senate Committee on Library and Scholarly Communication, and the Office of Intellectual Property Administration.

List of Journals that Submit All NIH-Funded Final Published Articles to PubMed Central:  http://publicaccess.nih.gov/submit_process_journals.htm
Methods for Locating PubMed Central IDs:
The PubMed Central reference number (PMCID) for articles covered by the public access policy is required in all documents submitted to the NIH; following are methods to find it:
   ▪ PubMed Central Search Option for Embargoed Articles:  http://www.nlm.nih.gov/pubs/techbull/so09/so09_pmc_embargoed_articles.html

My NCBI: Managing Compliance with the NIH Public Access Policy Using My Bibliography
New features have been added to this interface from the National Center for Biotechnology Information.

EndNote and the PMCID:  http://www.endnote.com/support/FAQs/Import/faq15.asp
EndNote can import PMCIDs. For information on using EndNote, see <http://guides.library.ucla.edu/endnote>.

SHERPA/RoMEO:  http://www.sherpa.ac.uk/romeo.php
Useful tool to see whether a journal or publisher complies with the public access policy; also provides such information about publishers and journals as their self-archiving policies and links to publisher copyright agreement policies
